• Up to 30 feet operating distance
• Operating Voltage: 3.0V - 5.0V
• Working Current: <5.0mA
• Standby Current: 2.5mA
• Sleep current: <200pA

• Charging Current: >100mA
• Standby Time: 60 days
• Charging Time: 4 hours
• Lithium-ion Battery Capacity: 180mA
• Uninterrupted Usage Time: 55 hours
• Lithium Battery Life: 3 years

BEFORE USING

Charging the Battery
Your Ultraslim Bluetooth Keyboard comes with a built-in rechargable battery. Before using it for the first time, it is recommended that you charge the battery for four hours. A blue LED light will flash slowly when your keyboard's battery is low. To charge your keyboard, insert one end of the included USB cable into the keyboard and the other end into an available USB port on your computer or USB Power Adapter (not included).

Connect your Keyboard
In order to use your Ultraslim Bluetooth Keyboard, you must first connect it to the device you intend to use it with. This is called "pairing". After you have paired your keyboard, your device will automatically connect to it when the keyboard is powered on and within it's 30 feet operating range.

Below you will find pairing instructions for some commonly used devices. If your device is not listed or you are having difficulty pairing with your device, please refer to that device's documentation.

## PAIRING YOUR DEVICE
Pairing with iOS
1. Turn on your Ultraslim Bluetooth Keyboard with the switch on the top of the device.

2. Turn on your iOS device and select Settings > Bluetooth

3. Enable your Bluetooth if it is not already enabled. Your iOS device should now be in discoverable mode.
4. Press the Connect button on your Ultraslim Bluetooth Keyboard to initiate the pairing process. The blue LED light will blink while you are in pairing mode.

5. Your iOS device will detect your keyboard as **Bluetooth Keyboard**. Select it from the list.
6. After selecting the device, your iOS device will display a PIN code. Enter these numbers on your Ultraslim Bluetooth Keyboard and press Enter on the keyboard.

(Note: Pin codes are randomly assigned. Enter the code your device gives you)

7. After pairing is successful, your Ultraslim Bluetooth Keyboard will display as Connected on your iOS device and the blue LED light on your keyboard will stop flashing.
Pairing with Android

1. Turn on your Ultraslim Bluetooth Keyboard with the switch on the top of the device.

2. Turn on your Android device and go to your Settings. From the Settings list, enable Bluetooth if it isn't already enabled.

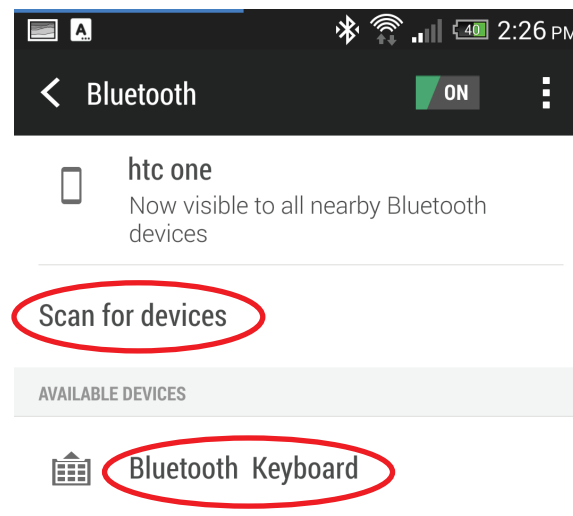

3. Press the Connect button on your Ultraslim Bluetooth Keyboard to initiate the pairing process. The blue LED light will blink while you are in pairing mode.

4. Select Bluetooth settings to start pairing.

5. Select Scan for Devices to detect available Bluetooth devices. Your Android device will detect your keyboard as **Bluetooth Keyboard**. Select it from the list.

6. Select **Bluetooth Keyboard** from the list. Your Android device will display a PIN code. Enter these numbers on your Ultraslim Bluetooth Keyboard and press Enter on the keyboard.

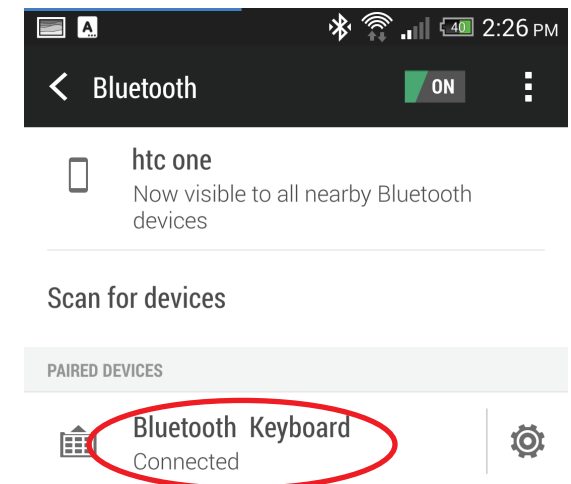

(Note: Pin codes are randomly assigned. Enter the code your device gives you)

7. After pairing is successful, your Ultraslim Bluetooth Keyboard will appear as Connected on your device's Bluetooth settings and the blue LED light on your keyboard will stop flashing.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.
